PROPOSAL BRIEF · INFRASTRUCTURE

Kitchen Upgrade — Cooking Safely, At Scale

\$6,000	Full kitchen upgrade goal
Any amount	Contributes toward this project
Serves	Feeding & Cup of Uji programmes

Kivutis Academy's feeding programme and morning porridge service both depend on a kitchen that was never designed for the volume of meals it now prepares daily. Ventilation is limited, storage is tight, and cooking surfaces are stretched to capacity as enrolment grows.

This proposal funds an upgraded kitchen: proper ventilation to clear smoke and heat safely, expanded dry-goods storage to buy staples like maize and beans in bulk at better prices, and durable cooking surfaces sized for school-scale meal preparation. The upgrade directly supports two donor-funded programmes already running at the school — the daily lunch and the morning cup of uji — making both safer and more efficient to deliver.

We are raising \$6,000 for this upgrade, built and supervised directly by Dr. Chris Kivuti and local contractors in Embu. As with all our infrastructure projects, donors may fund it in full, give any amount toward it, or direct a gift to the general infrastructure fund allocated to the most urgent active project each quarter. Gifts over \$1,000 receive a dedication plaque, and progress is shared through dated photo updates.
