**PROPOSAL BRIEF · INFRASTRUCTURE**

## Classroom Computers — Equipping the New Hall

|                    |                            |
|--------------------|----------------------------|
| <b>\$350</b>       | One computer, fully set up |
| <b>\$1,750</b>     | Five computers, a full row |
| <b>Destination</b> | The new Computer Hall      |

As Kivutis Academy works toward building a dedicated computer hall, that room will need machines to fill it. This proposal funds the desktop computers themselves — the same specification already used successfully in our existing Computer Resource Centre — reserved specifically for the new hall as it is completed.

A gift of \$350 funds one refurbished, tested desktop computer complete with keyboard, mouse, and a licensed operating system, installed and maintained by our on-site ICT coordinator. A gift of \$1,750 funds a full bank of five units, enough to equip an entire row of the new hall. Each donated unit is labelled with a small dedication plaque bearing the donor's name or organisation.

This gift is closely linked to two other campaign priorities: the Computer Hall itself, which will house these machines, and Computer Support, which keeps them running once installed. Donors are welcome to fund a computer independently of the hall's construction timeline; units are held and installed as soon as the room is ready, with photo confirmation sent once a donor's specific machine is in place and in use.
