

PROPOSAL BRIEF · INFRASTRUCTURE

School Library — A First Room Full of Books

\$10,000	Full library project goal
Any amount	Contributes toward this project
Impact	First dedicated reading room

Many pupils at Kivutis Academy have never had access to a room full of storybooks, reference materials, or a quiet space set aside purely for reading. Lessons currently rely on textbooks shared in class, with little opportunity for pupils to explore books independently or develop a reading habit outside the set curriculum.

This proposal funds a dedicated school library: a simple, well-lit masonry room fitted with shelving, reading tables, and an initial collection of storybooks and reference texts suited to CBC learners from ECD through upper primary. Beyond the room itself, a library gives every pupil, regardless of what they have at home, a first sustained encounter with books of their own choosing.

We are raising \$10,000 to build and furnish this room, managed directly by Dr. Chris Kivuti and local contractors in Embu with no intermediary overhead. Donors may fund the project in full, contribute any amount toward it, or direct a gift to the general infrastructure fund. Gifts over \$1,000 are recognised with a dedication plaque at the completed library, and donors receive dated photo updates as the project progresses.
