PROPOSAL BRIEF · INFRASTRUCTURE

Pupil Desks — A Seat of Their Own

\$40	One desk, seats two learners
\$400	Ten desks for a full classroom
Pairs with	Every classroom block we build

Every classroom Kivutis Academy builds still needs to be filled with something to sit at, and right now, incoming classes often make do with whatever desks can be moved, shared, or repaired from older stock. A simple, sturdy wooden desk, seating two learners side by side, is one of the most direct and least expensive ways a donor can equip a classroom.

A gift of \$40 funds one desk, built locally in Embu to the same design already in use across the Kivutis campus. A gift of \$400 furnishes an entire classroom of ten desks, seating twenty learners. Desks funded through this programme are typically paired directly with our classroom-block campaign, so that a newly built room is ready to seat pupils from its very first day of use rather than waiting on separate furnishing funds.

Because desks are made locally, this gift also supports Embu-area carpenters and small workshops. Donors funding ten or more desks for a single classroom may request a small dedication marking placed in that room, and all desk gifts are logged against the specific classroom they help furnish.
